

In The Specification

Please amend the specification as follows:

Page 12, third new paragraph:

With reference to Figure 4, a perspective illustration of the top face 100a of exemplary Personal Digital Assistant computer system 100 is shown. Top face 100a contains a display screen 105 surrounded by a bezel or cover. A removable stylus 80 is also shown. Display screen 105 is a touch screen capable of registering contact between the screen and the tip of stylus 80. Stylus 80 can be fabricated of any material which can make contact with screen 105. Top face 100a also contains one or more dedicated and/or programmable buttons 75 for selecting information and causing computer system 100 to implement functions. ~~A user interface button 95 can be used, for example, to turn the device on and off in one embodiment of the invention.~~
